Ingredients and supplies needed:

Red cabbage
Blender
Strainer
Clear plastic cups
Water
Bleach
Vinegar
Lemon Juice
Hand sanitizer
Sugar solution
Baking powder solution
Sprite
Spoon for stirring

1. ADD DROPS OF SPIDER BLOOD TO THE CLEAR POTIONS.
2. STIR AS NEEDED.
3. WATCH AS THEY MAGICALLY TRANSFORM!

Directions for making this magical potion science activity:

1. Add red cabbage to the blender with some water and blend well.
2. Pour the purplish cabbage liquid through a strainer to get out all the chunks and leave you a nice purple liquid. Put it in a jar and add our Spider Blood label.
3. Prepare eight cups and fill each one half way with a different liquid: water, bleach, vinegar, lemon juice, hand sanitizer, sugar solution, baking powder solution, and sprite. You can also experiment and use any other liquids you have around the house. Get creative!
4. Take your strained cabbage liquid (Spider Blood) and pour a small amount into each cup, stirring if needed. Go slowly and watch them magically change colors before your eyes! The kids will ooh and ahh as the magic happens!
